### **Problem Statement**

## Open Theme

A College mess management website which lets student's opt-in or out for meals, sending a nightly report to the storekeeper. It gathers meal feedback to refine menus and features a common room for open discussions among students, staff, and wardens

### **Tech Stack**

# **Features**

- **User Authentication:** Implement login and sign-up functionality, with role-based access for students, employees, and wardens.
- **Meal Registration:** Allow students to register for upcoming meals (breakfast, lunch, and dinner) each day, with the system automatically sending a daily report to the storekeeper by 10 PM.
- **Menu Feedback and Proposals:** Enable students to provide feedback on menu items after each meal and propose new menu ideas for future consideration.
- **Virtual Meeting Room:** Create a space where all users can openly express ideas, complaints, queries, and suggestions, fostering open communication.
- **Common Room for Staff and Wardens:** Designate a common room for students, employees, and wardens to engage in real-time discussions, encouraging transparency and collaboration.
- **Notice Board:** Display announcements, updates, and important notices for students and staff in a central location.
- **Complaint Box:** Include a virtual complaint box where students can submit issues or concerns privately, ensuring their feedback is addressed respectfully and confidentially.
